Thank you for considering Art Experience for your team-building event. Our Creative Team Building Package is designed to provide a quality shared learning experience and foster a stronger group dynamic among your staff.

We know that our Art Experience Team Builders will help unify your team, encourage creativity, boost confidence, and create a memorable shared experience.

During our painting sessions, each team member will contribute to a larger artwork by painting a smaller portion of the image. The overall design will be inspired by the group's contributions and the guidance of our professional artists.

We create your custom image based on your event's theme or by using image submissions provided by the team organizer. Our skilled artists are happy to incorporate any suggestions or references into the final artwork, ensuring it reflects the team's creativity.

All necessary supplies and professional instruction will be provided by our Art Experience artists. We will also supply table coverings and aprons for guests to protect their clothing. The painting session typically lasts 2 hours, but we can adjust it to fit your scheduling needs.

Our Art Experience artists will be present on location to ensure a smooth creation process. They will demonstrate techniques, provide guidance, and troubleshoot any

creative challenges, guaranteeing a high-quality finish for the final artwork. If desired, we can also provide a framed finish for the artwork and deliver it to your location for installation.

We are happy to accommodate groups of any size, and from any industry.

To receive a quote and discuss your event ideas further, please click on the following link: www.artexperience.us/get_quote.html or email us: richard@artexperience.us

*Pricing will include a quote for team builder painting session. A second quote is optional for mounting, framing, and delivery.
